#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
  - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) ☒ Responsive to communication(s) filed on 10 June 2004.
- 2a) ☒ This action is **FINAL**.                      2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### DETAILED ACTION

- 1) Acknowledgement is made of Amendment received 6/10/2004. Applicant amends claims 1, 4-6.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

- 2) Claims 1, 3-4, 6, are rejected under 35 U.S.C. 102(b) as being anticipated by Kaoru (JP-4-130190).

Claims 1, 3-4: Kaoru discloses a method of cleaning a surface of a papermaking rotating dryer drum wherein a release agent, an emulsified oil solution, is applied to the surface of the drum by direct spraying onto the surface. The oil penetrates the asperities on the surface of the drum and forms a film on the surface of the drum. The oil is then absorbed by the cellulose fibers of a paper strip, which rides on the drum. Example 3 discloses continuous spraying at a rate of 2.0 l/min. onto a surface of a Yankee drum dryer, without staining the paper strip by the release agent (Kaoru, translation, pages 2-5).

Claim 6: the emulsified solution mixture contains 20 parts of oils and 1000 parts of water (working example, pg. 3). Thus the ratio of water to oils is 50 to 1.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3) Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Kaoru.

Kaoru is applied as above for claim 1, Kaoru is silent on the drum dryer being a multiple type drum dryer, however, it would have been obvious to one skilled in the art at the time the invention was made, that the technical knowledge disclosed by Kaoru apply to a multiple type drum dryer.

4) Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Kaoru in view of Donnelly (3,014,832). Kaoru is applied as above for claim 1, Kaoru does not disclose the spray is a water oil combination of ratio claimed. Donnelly discloses a process wherein a dryer surface is kept clean by the release spraying of an emulsified oil agent (col. 3, lines 15-20, col. 5, lines 1-22) onto the surface of the drum (Donnelly, col. 7, line 50 to col. 8, line 30, and Figure 2). Donnelly discloses in Example I, oil-in-water emulsion having 6% of oil, and thus 94% of water, which calculates the water to oil ratio as 15.7, which reads on an agent wherein water is 3 to 30 times as much as oil, recited in claim 5. It would have been obvious to one skilled in the art at the time the invention was made, to combine the teachings of Kaoru and Donnelly, because such a combination would improve the control of adhesion of the web to the dryer surface thus improve the quality of the Kaoru product as disclosed by Donnelly (col. 2, lines 50-68).

***Response to Amendment***

5) Claims 1-6, rejection under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Donnelly (3,014,832), is withdrawn in view of amended claims.

***Conclusion***

6) Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
